Awards

Target Award

Award Description: Bachelor of Science with Honours - BSH

Alternative Exit

Award Description: Bachelor of Science - BS

Award Learning Outcomes: Demonstrate a broad and comparative knowledge of the general scope of the subject, its different areas and applications, and its interactions with related subjects. A detailed knowledge of a defined subject or a more limited coverage of a specialist area balanced by a wider range of study. In each case, specialised study will be informed by current developments in the subject. Demonstrate a critical understanding of the essential theories, principles and concepts of the subject(s) and of the ways in which these are developed through the main methods of enquiry in the subject.

Alternative Exit

Award Description: Certificate of Higher Education - CHE

Award Learning Outcomes: Define and describe the foundational concepts underpinning psychology and sport and exercise psychology Outline and describe the key foundational skills underpinning sport and exercise psychology Identify the foundational components of psychological methodology and research. Identify the key theories and techniques within research methods in sport and exercise psychology contexts Explore and develop personal and professional skills in the context of fundamental employability skills Work independently and with others, recognising and respecting the values of equality and diversity Identify how factors such as race, ethnicity, religion, gender, sexuality, disability, class, socioeconomic status, and citizenship, and intersections thereof, impact within society, and how these contribute to experiences in sport and exercise psychology

Alternative Exit

Award Description: Diploma of Higher Education - DHE

Award Learning Outcomes: Explain and evaluate the principal concepts and theories within psychology and sport psychology. Analyse and apply the skills central to applied sport and exercise psychology work Evaluate and utilise the advanced components of psychological methodology and research Explain the

principle concepts and theories and conduct analytical techniques within research methods in a sport and exercise science psychology context Reflect upon and develop personal and professional skills and self-awareness in the context of fundamental employability skills Work independently and with others, as both a team member and a leader, recognising and respecting the values of equality and diversity Reflect on the role that each individual plays in shaping the landscape of sport and exercise psychology and the contribution that we can make to transforming our own and other people's experience(s)

Accreditation

British Psychological Society (BPS)

Type of Accreditation: Accredited against the requirements for the Graduate Basis for Chartered Membership (GBC) of the British Psychological Society (BPS).

Programme Offerings

Full-Time

F2F-JMU-SEP

Mode of Delivery: Face to Face

Intake Month: September

Teaching Institution: LJMU Taught

Programme Length, Programme Duration: 3 years

Educational Aims of the Course

The BSc. (Honours) Sport Psychology programme is designed to provide a current, coherent and vocationally relevant programme of study to degree level for students interested in the discipline of Sport Psychology. On completion of the programme students will have acquired a knowledge and skill base relevant to the vocation of Sport Psychology that will facilitate progression onto postgraduate study. The programme provides the opportunity to attain Graduate Basis for Certified Membership (GBC) from the British Psychological Society (BPS). Graduate Basis for Certified Membership is a pre-requisite for entry onto BPS accredited Stage 2 professional training postgraduate programmes in Psychology, including Health and Care Professions Council (HCPC) approved independent route qualifications and Professional Doctorates in Sport and Exercise Psychology. The programme

aims to: Provide a progressive and challenging programme of study that is informed by research and scholarly activity and meets the needs of the profession of sport and exercise psychology; Provide a programme of study that develops core knowledge and understanding of psychological principles, concepts and theories appropriate to the field of sport and exercise psychology; Provide supportive, stimulating and diverse learning environments for students to develop intellectual skills of evaluation, critique and integration of psychological theory; Produce a scientific understanding of mind, brain, behaviour, and experience, and how they interact; Equip students with a range of core skills that facilitate progression onto postgraduate study, including professional doctorate and independent professional training routes relevant to the profession; Enable achievement of Graduate Membership (GM) and Graduate Basis for Chartered Membership (GBC) from the British Psychological Society (BPS); Encourage students to fully engage with the Future Focus programme which enables students to explore their employability skills and mindset- including proactivity, adaptability and resilience, and expand their awareness of career possibilities; Develop employability skills and mindset throughout the programme that are aligned to the LJMU Employability Strategy. Transform student employability skills, self-awareness, agency and aspirations to be able to make a difference to professional practice through exercise and sport. Encourage appreciation and reflection on how protected characteristics (such as ethnicity, culture, sex and gender, religion, sexuality, socioeconomic status),and intersections thereof, contribute to experiences in Sport and Exercise Psychology and what action can be taken to promote a more equitable society.

Learning Outcomes

1. Effectively use and synthesise knowledge and understanding of research methods in sport and exercise psychology.
2. Recognise and apply appropriate subject knowledge when performing problem solving skills in sport and exercise psychology contexts.
3. Conduct data collection and research skills.
4. Demonstrate effective evaluative and analytical skills.
5. Demonstrate effective comprehension skills and use of data when developing written reports.
6. Analyse, appraise and synthesise information critically from a variety of sources including published research and reports.
7. Retrieve and organise information effectively.
8. Carry out an extensive piece of independent empirical research, applying skills of choosing and applying appropriate advanced empirical methodologies and the treatment of resulting data with appropriate analytical methods
9. Use a variety of psychological tools, including specialist software, laboratory equipment and psychometric instruments.
10. Apply skills of literature search, critical review and selection of relevant sources, and systematic synthesis and treatment of key material.
11. Use reflective practice to develop awareness of individual skills required to support the development of an applied practitioner;

12. Effectively use knowledge and understanding of foundations and principles in sport and exercise psychology.
13. Critically apply detailed knowledge of research methods in a sport and exercise psychology context and effective deployment of the research process through the planning, production, analyses and interpretation of investigations;
14. Use employability skills to effectively navigate and contribute to a work-based context and develop a compelling onward plan.
15. Work effectively independently and with others, as both a team member and a leader, recognising and respecting the values of equality and diversity.
16. Critically reflect on the concept of unearned advantages based on factors such as race, ethnicity, religion, gender, sexuality, disability, class, socioeconomic status, and citizenship, and intersections thereof, in the context of sport and exercise psychology and how we can act to promote a more equitable, diverse, and inclusive sector.
17. Effectively use knowledge, understanding and skills in applied sport and exercise psychology.
18. Effectively use knowledge and understanding of biological and cognitive psychology.
19. Effectively use knowledge and understanding of developmental, social and individual differences in psychology.
20. Synthesise and critically appreciate knowledge of psychology and development issues in sport and exercise.
21. Synthesise and critically appreciate knowledge of motor behaviour.
22. Synthesise and critically appreciate knowledge associated with applied sport and exercise psychology application across different contexts.
23. Demonstrate effective oral and written communication skills.

Teaching, Learning and Assessment

Teaching and learning. This programme will be delivered with a range of teaching and learning methods. It contains formal contact time and directed and private study. Students will be encouraged to develop their learning skills and to become progressively more independent in their learning, so students are given more direct study in level four and more private study at level six. This is facilitated through the inclusion of an academic skills module in semester one of level 4. Students will develop skills of time management and how to use appropriate resources (e.g., IT and library) to find and organise information. Students learn to select and evaluate suitable materials from disparate sources. Students will develop integrative skills to analyse and solve problems applying appropriate numerical and statistical techniques when required. They will be able to communicate scientific information effectively. During the programme, lectures and directed independent reading are used to introduce core knowledge. Lectures are supplemented by seminar, laboratory and practical activities in which students can explore ideas in more depth and contribute to, and benefit from, peer learning. Individual supervision meetings support students in developing, conducting and reporting an empirical investigation in sport psychology. In addition,

students are expected to cover substantive course content through their own directed reading. These approaches are consistent with the learning outcomes of each specific module. Practical skills are taught during practical classes, which form a component of the teaching on several modules and within in-session tasks more broadly. These practical activities provide opportunities for formative feedback from both peers and tutors. Similarly, tutor support during the preparation of coursework assignments (feedforward sessions) provides opportunities for formative feedback. Assessment and feedback. A variety of assessment methods are utilised across the programme. Formal assessment methods include essay assignments, written examinations (using seen or unseen questions),multiple choice tests, portfolios, reflective work-related learning reports, poster presentations, laboratory reports and supervised major projects. In formulating the assessment strategy, the programme team aimed to achieve an appropriate match between teaching and learning methods and assessment tasks, including the provision of formative feedback, an appropriate balance of assessment tasks over the programme, and inclusivity of a range of student approaches to learning. Coursework assessment is used to provide timely and detailed summative assessment. Individual tutors take advantage of opportunities to provide formative assessment during modules. A consistent approach to the provision of summative feedback will be taken; the use of marking rubrics to ensure breath in feedback provided, whilst qualitative feedback under the headings “areas for enhancement” and “strengths of the assignment” will provide depth, specificity, personalisation, and a future focus to feedback. Assessment methods are specified on each modules Canvas page. Equity, diversity & inclusion (EDI). In 2021, an ‘inclusive curricula team’ was formed and this working group successfully secured internal funding to enable student interns to lead an audit of our programmes in relation to decolonising the curriculum, with the support from the academic team. We recognise that a colonial curriculum is an inaccurate curriculum, characterized by an unrepresentative, inaccessible, and privileged nature. Decolonising the curriculum is about being more accurate, more inclusive, and more interculturally responsive. EDI is an increasingly important focus for our School (the School also have Athena SWAN Bronze status). We recognize that to deeply embed EDI into the fabric of what we do, we need to focus our curricula.

Opportunities for work related learning

The School recognises that employment experience is a major differentiating factor in a graduate's curriculum vitae. In this regard, work related learning and applied experience are integral components of the programme and provides an opportunity for all students to conduct learning within a placement setting. Work placements have included applied sport/exercise psychology experience across a range of sport and exercise settings, psycho-educational programme development and delivery, work with local charities and local primary and secondary schools. Placements at level six are supported by the Practice Learning Support Unit (PLSU). In order to prepare students for work related learning opportunities, the programme incorporates a series of progressive professional practice modules that focus upon key theoretical content, practical and applied knowledge and skills. These modules also enable a progressive framework for reflection and personal development planning (employability perspective) to be developed. This is complemented by an integrated careers curriculum as well as the opportunity for students to engage in the University wide Future Focus programme. Overall, the School provides a world class research informed curriculum alongside a structured and focused approach to employability that ensures the programme remains at the forefront of applied sport and exercise psychology.

Programme Structure

Programme Structure Description

There are four strands on the programme to structure the content into cognate areas, namely professional

practice, research skills, core psychology, and sport and exercise psychology. The course is accredited by the British Psychological Society (BPS) and confers graduate eligibility for both Graduate Membership of the British Psychological Society and the Graduate Basis for Chartership, provided students pass the empirical psychology project and gain at least a Lower Second Class Honours degree. All modules are core to ensure appropriate outcomes in relation to the British Psychological Society (BPS) competencies. Study Abroad The programme will offer the opportunity of an additional study year abroad following Level 5. Students will be enrolled on a 480 credit honours with study abroad programme. Of those 480 credits, 120 will be taken via a Level 5 study abroad module (5103SPOPSY). The modules to be studied in the host institution must be agreed in advance. The Level 5 mean for the final award mark will be calculated based upon the 240 credits at Level 5. Students who joined the programme prior to September 2022 will follow the previously validated version of this programme.

Structure

Level 4

Level 4 Core

4051SPS	20 credits	**Professional Practice in Sport Psychology 1**
4052SPS	20 credits	**Introduction to Developmental Psychology and Individual Differences**
4053SPS	20 credits	**Introduction to Cognitive and Biological Psychology**
4054SPS	20 credits	**Academic Skills (Sport Psychology)**
4091SPS	20 credits	**Research Methods 1**
4093SPS	20 credits	**Psychosocial Principles of Sport and Exercise**

Level 5

Level 5 Core

5051SPS	20 credits	**Professional Practice in Sport Psychology 2**
5052SPS	20 credits	**Advances in Cognitive and Biological Psychology**
5053SPS	20 credits	**Exercise and Health Psychology**
5054SPS	20 credits	**Developmental and Social Psychology**
5091SPS	20 credits	**Research Methods 2**
5093SPS	20 credits	**Sport and Performance Psychology**

Optional placement

Study Abroad

120 Credit Points

5103SPOPSY	120 credits	**Study Year Abroad - Applied Sport Psychology**

Level 6

Level 6 Core

6051SPS	20 credits	**Professional Practice in Sport Psychology 3**
6052SPS	20 credits	**Applied Motor Behaviour**
6053SPS	20 credits	**Current Issues in Sport and Exercise Psychology**
6054SPS	20 credits	**Applied Sport and Exercise Psychology Placement**
6091SPS	40 credits	**Major Project**

Entry Requirements

A levels

BBB-ABB
Minimum Number of A Levels: 2
Maximum AS UCAS Points: 21
Subject requirements: At least one A level qualification in sport, science or social science-related discipline

Access awards

Acceptable on its own and combined with other qualifications

Minimum of 120 points including relevant subjects

BTECs

Extended Diploma: DDM

GCSEs and equivalents

Grade 4 or grade C or above in English Language and Mathematics/ Numeracy.

GCSE Equivalences accepted:
• Key Skills Level 2 in English/Maths
• NVQ Level 2 Functional skills in Maths and English Writing and or Reading
• Skills for Life Level 2 in Numeracy/English
• Higher Diploma in Maths/English
• Northern Ireland Essential Skills Level 2 in Communication or Application of Number
• Wales Essential Skills Level 2 in Communication or Application of Number

IELTS

6.0 overall with no component below 5.5, taken within two years of the course start date.

https://www.ljmu.ac.uk/study/courses/international-entry-requirements

International Baccalaureate

Acceptable on its own and combined with other qualifications From a relevant subject

Irish awards

Acceptable on its own and combined with other qualifications From a relevant subject

OCR Cambridge Technical

Extended Diploma: DDM

T levels

Acceptable on its own and combined with other qualifications.

You need to obtain the required UCAS points from a related subject area.

Current Academic Calendar

Current Academic Calendar

The university may make changes to a programme of study or module where such changes are deemed to be beneficial to students, or are minor in nature and unlikely to impact negatively upon students or become necessary due to circumstances beyond the control of the university. Such events are rare, but where this does happen the university operates a policy of consultation, advice and support to all enrolled students affected by a proposed change to their programme or module. Where changes are proposed which will affect existing students, programme teams must ensure that those students will not be disadvantaged by the change.

Examples of essential change include: changes enabling new research to be brought into the curriculum, or changes that are subsequently agreed in response to concerns expressed by students, external examiners or professional, statutory and regulatory bodies (PSRBs). Oversight and approval of changes through review and minor change processes provide an additional safeguard to the student experience of continuing students.

Liverpool John Moores University, Exchange Station, Tithebarn St, Liverpool, L2 2QP
